

Traceable On Site Calibration

Qualification

- ISO 9001 & 10012 Reg.
- Z299.2:85 Reg.
- QS 9000 compliant
- Trained technicians

Capabilities

- Over 300 certified calibrators
- OEM training & support
- Auto Recall program
- Over 25 Instrument technicians

On site calibration performed by Marsh are traceable to national standards, complete with calibration reports & cal stickers. Documents and procedures have been approved to meet the most stringent QA requirements.

Our technicians received both safety and technical training to ensure Reliability and value to our customers.

We Calibrate:

• Pressure (gauges and transmitters) • Temperature

- Gauges
 - Standard
 - Liquid filled
 - Sanitary
- Transmitters
 - Pneumatic
 - Analog
 - Digital
 - SMART
- Pressure Switches
- Thermocouple: all standard types
- RTD: 10WCU, 100WPt
- Thermistor
- Filled systems to 600C
- Dial thermometers
- Infra Red
- Temp. switches

• Flow

Flow Meters

- Magnetic flow meters
- Mass Flow Meters
- Vortex
- Differential pressure type
 - Orifice plate
 - Dall tubes
 - Low loss tubes

• Level

- Pressure type
- Ultrasonic
- Radar
- Capacitance
- Resistance
- Yo-yo
- Paddle
- Laser

- Venturi
- V-cone
- Non-contact type flow meters
 - Doppler
 - Transit time
- Open Channel type
 - Detector types
 - Ultrasonic
 - Displacement
 - Resistive / capacitive

- Laser Switches

Flow Switches

Flow Surveys

- Doppler for high turbidity
- Transit time for clean fluids

• Analysers

- pH
- Conductivity
- ORP
- Turbidity
- Viscosity
- Relative humidity
- Chlorine Area Monitors
- Gas Analysers

• Recorders and controllers (Single and multi channel)

- Pneumatic
- Analog
- Digital
- SMART

• Transmitters

- Pneumatic
- Analog
- Digital
- Smart

• Valves

- On-Off Valves
- Control valves
- Relief valves

• Indicators

- Panel Meters
- Bar Graphs
- Displays

• Surveys

- Temperature Uniformity
- Flow surveys
 - Doppler for high turbidity
 - Transit time for clean fluids
